

TeleEye

CX multi-stream video simply faster & better

Mobile Video Monitoring
TeleEye iView

IR Remote Control for CX

TeleEye CX Series is a range of simple to use yet feature rich 4-, 8- and 16-channel video recording servers suitable for small to medium sized surveillance applications. Powered by its revolutionary SMAC-M multi-stream video coder, TeleEye CX delivers truly "no compromise" on both DVD-quality recording and fast video transmission performance. TeleEye CX incorporated with SMAC-M can record 60% longer and transmit 50% faster than MPEG-4 systems.

TeleEye CX guarantees consistent high quality recorded video up to 100/120fps at CIF and 25/30fps at D1. The system is quick to install and easy to configure. It delivers users with real time video over iPad, iPhone or mobile phone while they are on the move. TeleEye CX also allow user to manage video simply using a web browser. When using with TeleEye multi-site software, videos from large number of sites can be monitored and recorded.
