

TeleEye M-303

TeleEye M-303 Mobile Video Monitoring Solution gives you the best access to live video via mobile phone. More than making voice calls, listening MP3 and playing games, TeleEye M-303 can even make your business portable with mobile phone while you are on the move.

TeleEye M-303 is a J2ME based application running on mobile phone and partnered with TeleEye RX Series Video Recording Server. Just by a simple click on your mobile phone, you can make connection to a remotely located TeleEye RX Series Video Recording Server and then view instant video wherever you are. Whether it is operated on HSDPA, 3G, EDGE or GPRS, it also works well!

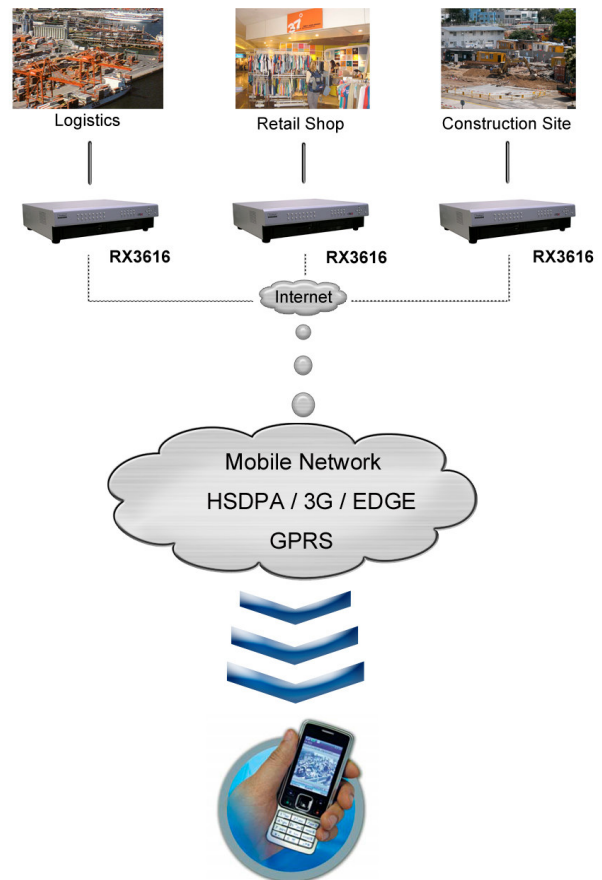

Features

- Video transmission on HSDPA, 3G, EDGE or GPRS
- Up to 16 video channel selections
- Password protection
- *sureLINK* technology support dynamic IP Internet connection
- Easy-to-use channel selection
- Event status
